Arranged According to The Scott Classic Catalog with Sassone Catalog Cross-References

1859

Unwatermarked
Imperforate

Counterfeits

Type 10

- The corner ornament at the lower left, as in Counterfeit Type 8, has not dots. The other three ornaments have one heavy, stumpy projection from each ring. The "Y" shaped figures are usually blotchy and indistinct.
- The bottom serif of the "B" of "BOLLO" is well below the rings, and, if extended, would miss them entirely. In Type 8, the serif would cut well into the ring.
- The stops after "BAL" are large and round. The lower one is below the level of the letters and almost touches the serif of the "I".
